

THE VACUOLE SONG

<http://youtu.be/evW93DtSoZY>

G C G
A plant is made of many cells,
C A7 D
Inside are tiny organelles.
G C B7 Em
I am the largest of them all
C G D G
I help to prop up the cell wall

When little plants begin to grow
They use up many nutrients so
I store the proteins for their needs
Jus' like a cupboard in their seeds.

D7
It's me, the vacuole
G
Not just an empty hole
D7
I'm your chubby, fluid-filled buddy
G
I will help you grow
C G
And I want you to know
B7 Em
that I can shrink and swell
C D G
I'm the biggest organelle

Oh little plant cell, as you grow,
I can do lots more jobs you know
Now that I have a different role
I am called the lytic vacuole

I store waste products, it's my pleasure
I'm like a trash can under pressure
I don't let rubbish hang about
I chop it down and throw it out

It's me, the vacuole
Not just an empty hole
I'm your chubby, fluid-filled buddy
I will help you grow
And I want you to know
that I can shrink and swell
I'm the biggest organelle
